

Vs-80H

Hybrid high Performance Injection Moulding Machines

Vs-80H

With a powerful controller designed for universal processing applications, this series of machinery is fast, accurate and excellent for productivity.

With two controllers to choose from and standard proportional flow control, this Victor injection-moulding machine can help you reach maximum productivity using a wide range of materials.

Machine Weight	tons	3.3
Actual shot Weight-p.s.	g	98 124 153
Injection Pressure Max	kg/cm ²	2490 1967 1594
Screw Diameter	mm	32 36 40
Clamping Force	tons	80
Max. Clamp stroke	mm	320
Min/Max Mould Thickness	mm	150 - 350
Tie-Bar Distance (HxV)	mm	360 x 360
Machine Dimensions	m	4.230 x 1.135 x 1.900
